Create New Proposition

Answer Strategic Questions

1

Why Change

Describe the existential threat or the “**burning platform**”

2

What Is Winning

Define our **strategic intent** (aspiration)

3

Where Do We Play

Set the dimensions and **boundaries** of where we intend to compete

4

How Do We Win

Make the **strategic play** (big move) we take to win in the market

5

What Is Our Big Idea

Design the **future state proposition** and its difference

6

What Choices Do We Make

Make the combination of **strategic choices** that will help us win

7

What Capabilities Do We Need

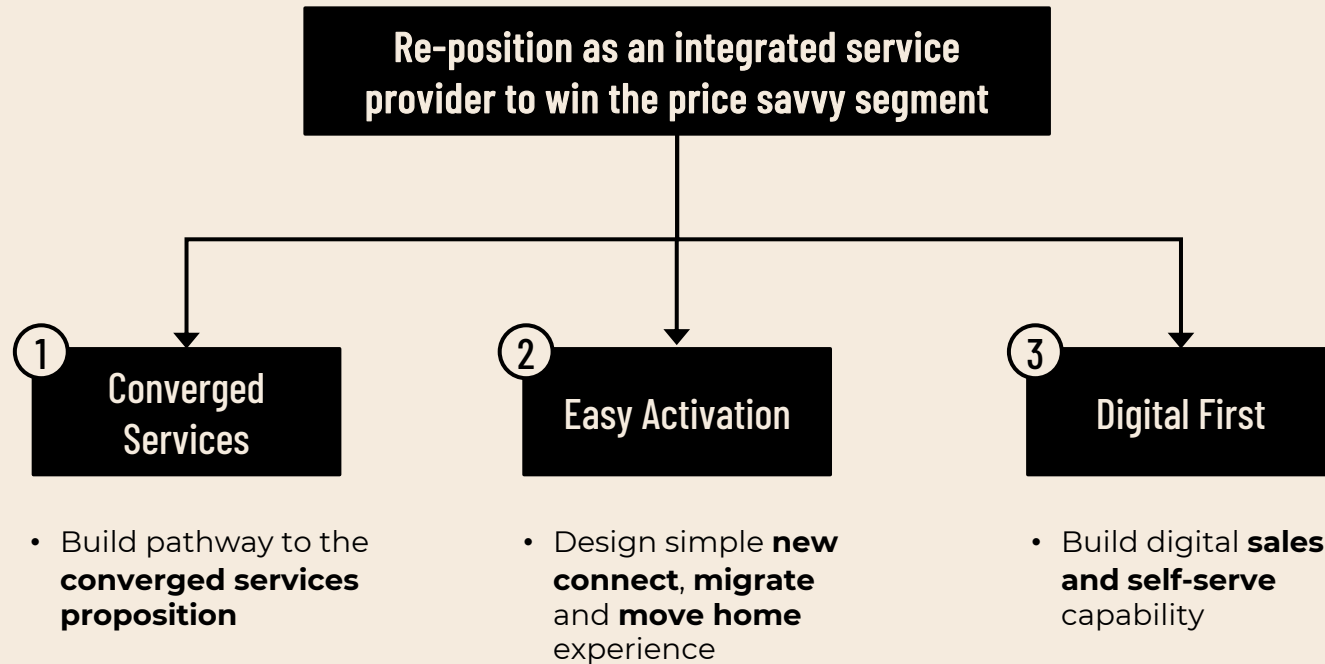

Identify the set of **capabilities** we need to succeed

8

How Will We Execute

Develop the **execution plan** for our strategy

Structure The New Play

Success Factors

- Strong emphasis on **core inclusions** at a given price point
- **No-frills offering** with **large allowances** and **fast speeds** at the expense of high-touch service
- **Simple plan options** and no usage-based pricing (and no bill shocks)
- Easy to **change plans** and **buy add-ons**
- Easy to **get help quickly**
- Infinity is **sufficiently differentiated** on product, channel vs. Tier 2s
- Sticker **price parity or leader** vs. price savvy competitors
- Fundamentally different operating model, designed to be **low-cost**

Create Value Proposition

Mark The Difference

Architecture

Components of our solution

Dimension 1	Parity
Dimension 2	<i>Difference</i>
Dimension 3	Parity
Dimension 4	<i>Difference</i>

Architecture (Example)

Principles

Simple Products

Great Value Data

Fast Internet Speeds

Flexibility

Easy Online Self-Serve

Architecture

Product	Network speed	• Parity
	<i>Plan options</i>	• Differentiator
	Monthly fees	• Parity
	Set-up fees	• Parity
	Data inclusion	• Parity
	No hidden costs	• Parity
Experience	24x7 call centre	• Parity
	<i>Digital self-serve</i>	• Differentiator
	<i>Activation</i>	• Differentiator

Difference (Example)

The logo for 'my Infinity' is enclosed in a circular frame with a red-to-white gradient border. The text 'my Infinity' is in a bold, black, sans-serif font.

my Infinity

UNLIMITED DATA
Control your service
month-to-month

Differentiates

*Unlimited data shared across fixed
and mobiles lines*

Dial up/down your service experience

Easily managed, digitally

How It Works (Example)

my Infinity

**SELECT YOUR
LINES...**

Simple Options

Customers select fixed or
mobile lines
(up to 5 per customer)

Home Internet

Mobile Phone

Wearable

**...PICK YOUR
EXPERIENCE...**

Flexible

Customers choose their
service experience
(select a profile)

Default

Video Plus

Gaming

... AND ENJOY

Easily Managed

Customers modify their
service as needs change
(add/remove connections or
change profiles)

Plug n' Play

Tap to Add Service

Stages Of Journey

Explore

- See promo on social
- Speak to friends and family
- Read reviews online

Contextual experience

Targeted campaigns

Social engagement

Buy

- Step thru a simple checkout process to buy fixed and mobile access

Simple checkout flow

Digital only offers

Conversion optimisation

Connect

- Receive a plug n' play device
- Authenticate and activate service

Plug n' play

eSIM ready

Straight thru process

Use

- Toggle on the "video profile" in the app to stream 4k video

Traffic mgmt.

Unlimited data

Get Help

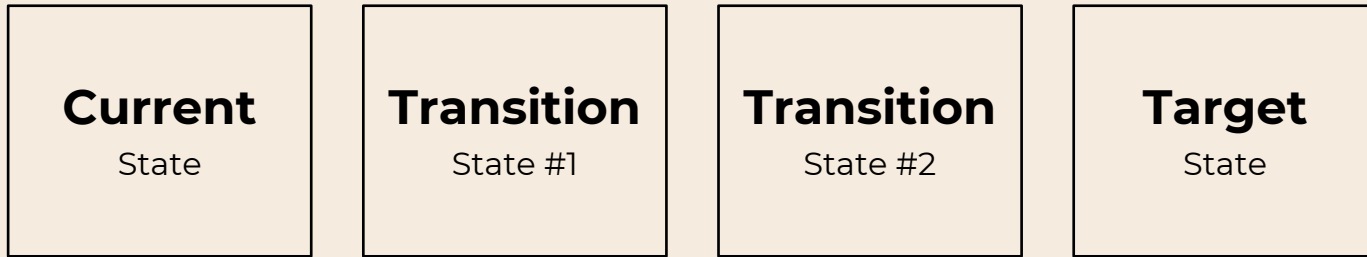

- Navigate "Help" on the mobile app to diagnose device

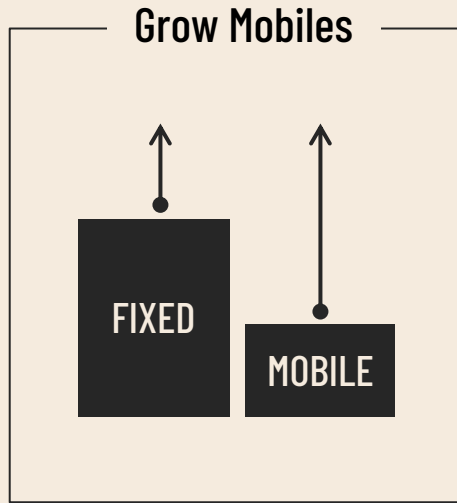

Self-serve diagnostic

Personalised support

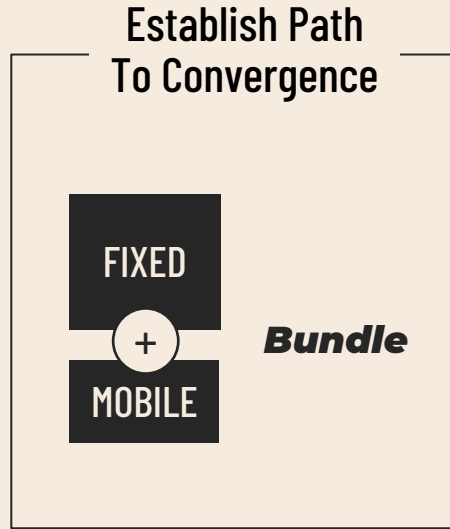

Progression

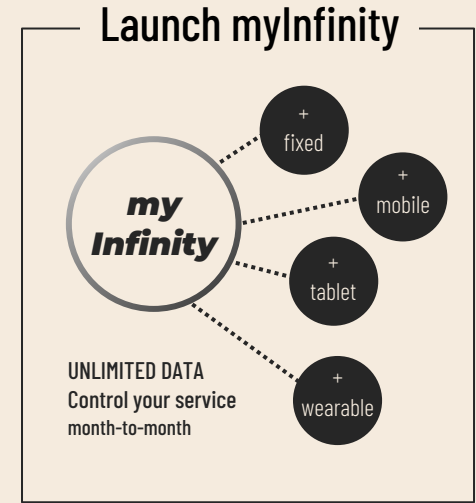

Progression (Example)

- Emphasis on generous allowance and data banking
- X-sell of mobiles to fixed

- Develop a fixed and mobile bundle offer
- Create multi-SIM offer for mobiles

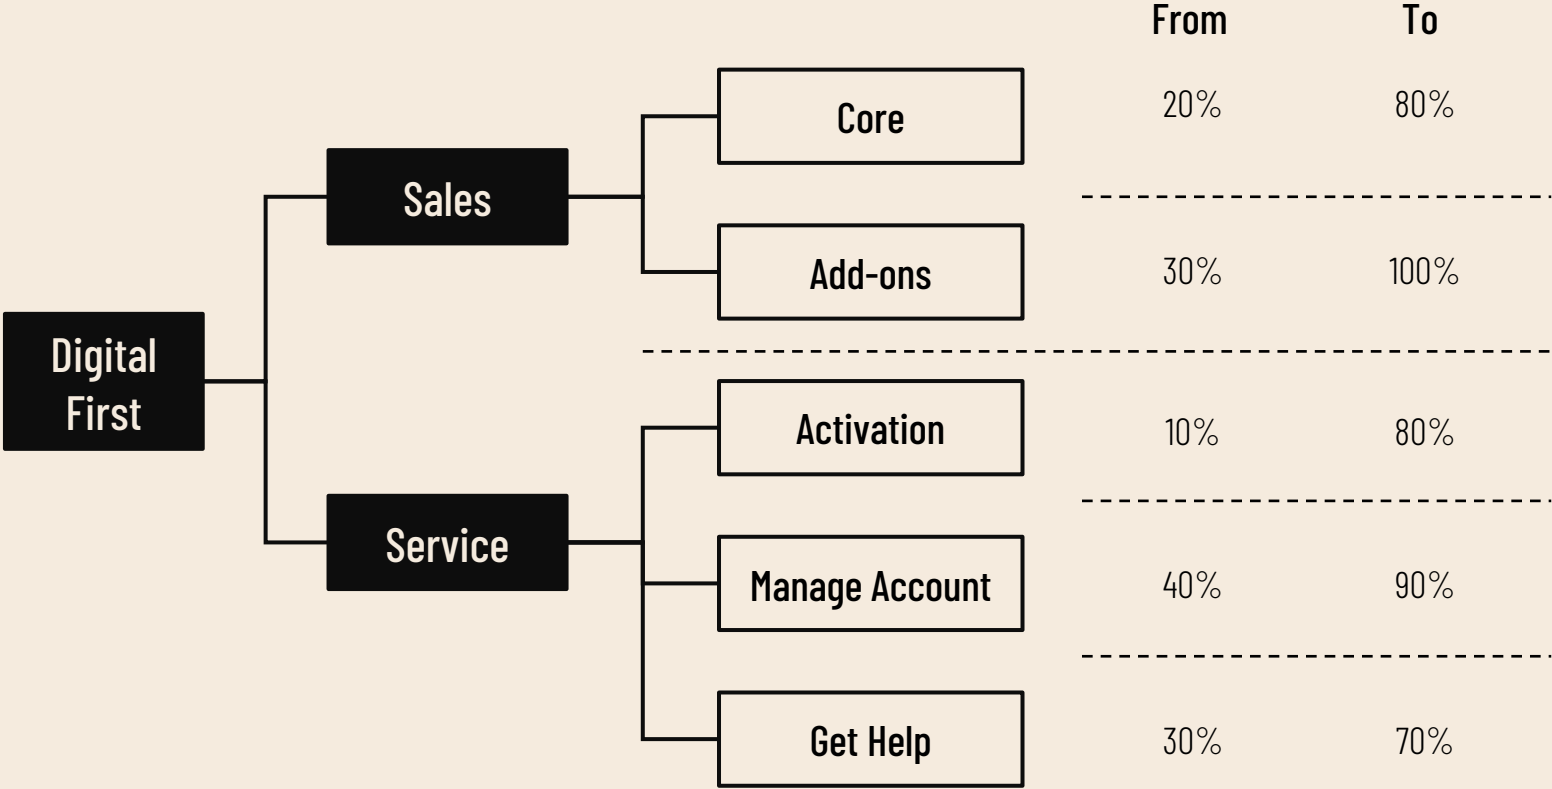

- Launch new converged services proposition
- Customers can control their service experience

Design New Experience (Example)

	<i>From...</i>	<i>...To</i>	Enablers
New Connect	• Long order-to-activate cycle times for home internet • High call volume, complaints	• Easy to buy and connect plans and add-ons, all online • Same day order-to-activate	- Hybrid Modem - Pre-activated SIMs
Migration	• Long connection down times • No progress tracking • Churn to competitor	• Automated, consistent migration journey • Online progress tracking and notifications	- Plug n' Play - Interim Mobile SIM - In-app Tracking
Move Home	• Long connection down times • Manual fulfilment • Frequent calls to check status	• Digitally enabled, simple start-to-end move • Welcome "house-warming" gift to get up and running	- Interim Mobile SIM - Online Flow

 Signature Proof Points

Be Digital First (Example)

Be Digital First (Example)

Approach

- Incentivise using **online exclusive deals**
- Simple, **intuitive checkout**

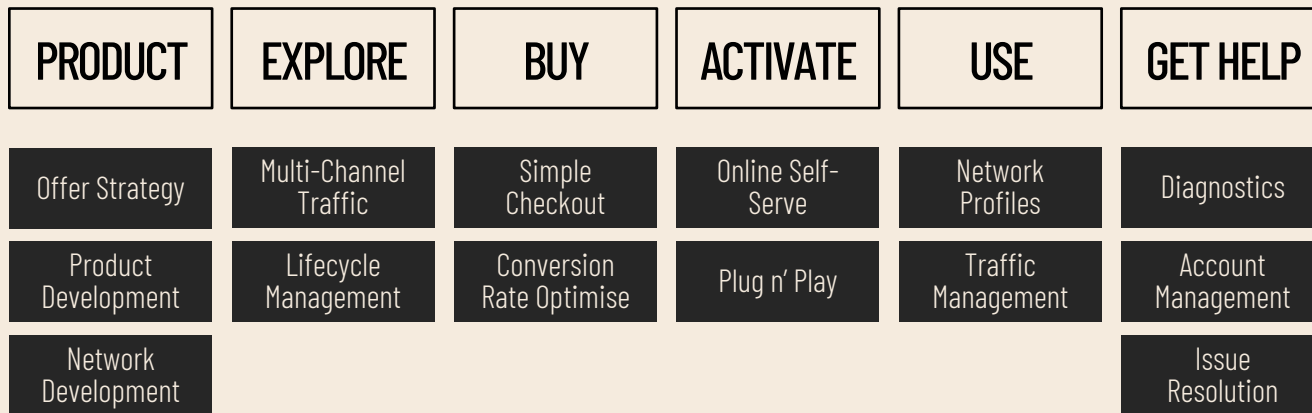

-
- Only way to purchase is via self-serve
 - Targeted, **contextual offers**

-
- **Start and end** activation online
 - Real-time **progress tracking**

-
- Robust **account management** in-app
 - **Personalised experience**

-
- Self-serve **diagnostic tools**
 - Up-to-date **knowledge articles** and FAQs
 - **Online chat** and ticket monitoring

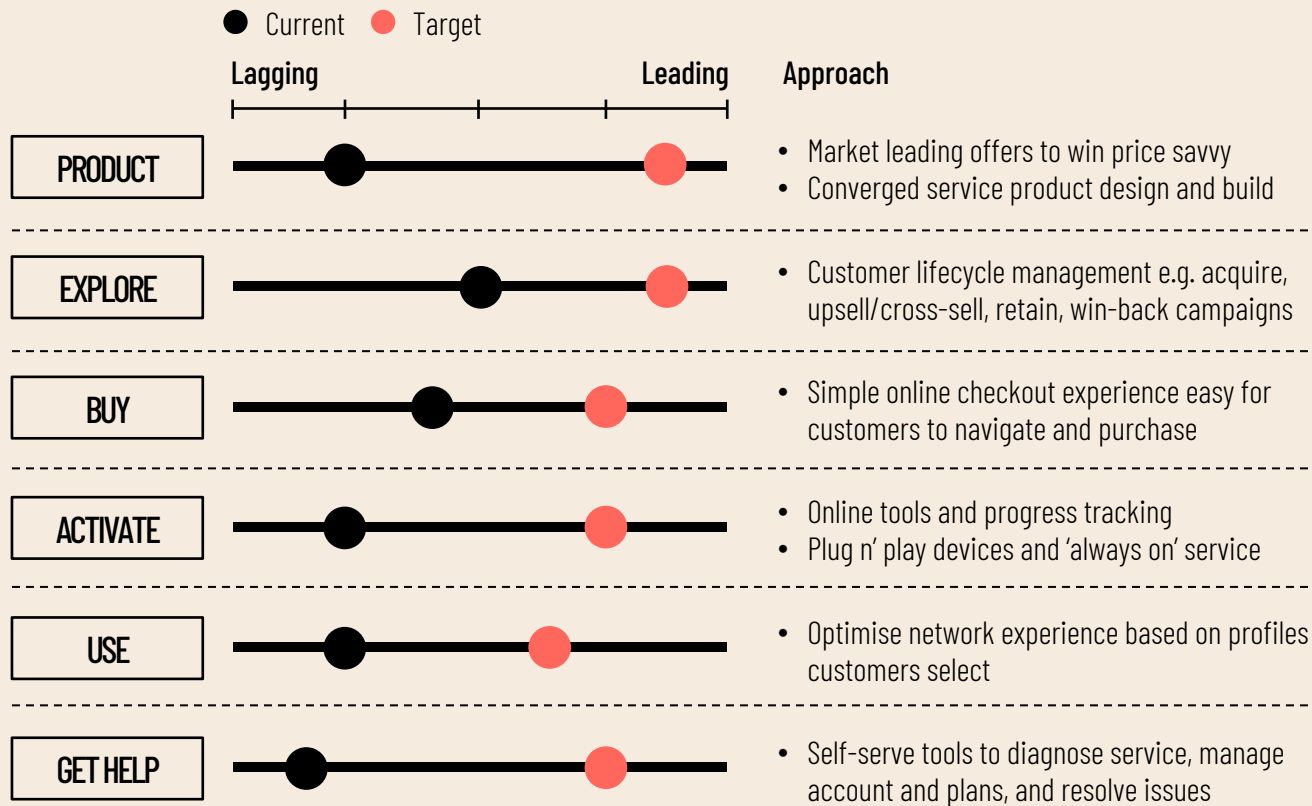

Value Chain

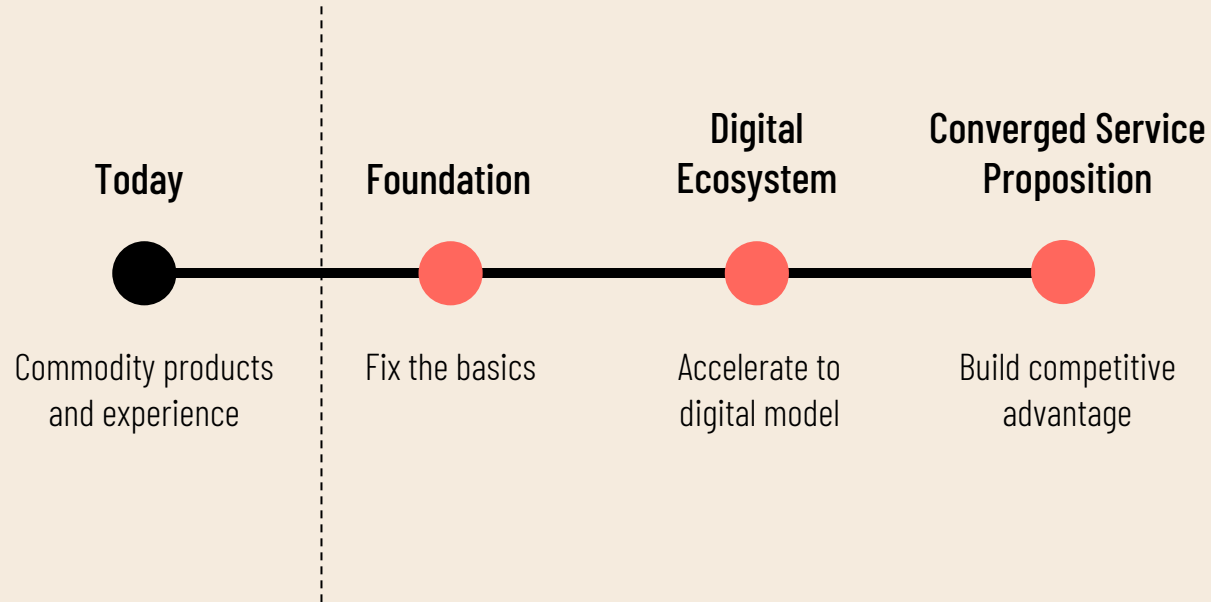

Enabler Diagnosis (Example)

		Current	Target
GET HELP	Diagnostics	- No self-serve ability - Call up technical support	Diagnostic tool in-app to check health of service
	Account Management	Limited features online, all else requires phone support	Robust self-service features in-app for most use cases
	Issue Resolution	Call helpdesk for all issues	- Able to raise issue in-app and track progress - Phone support for complex issues

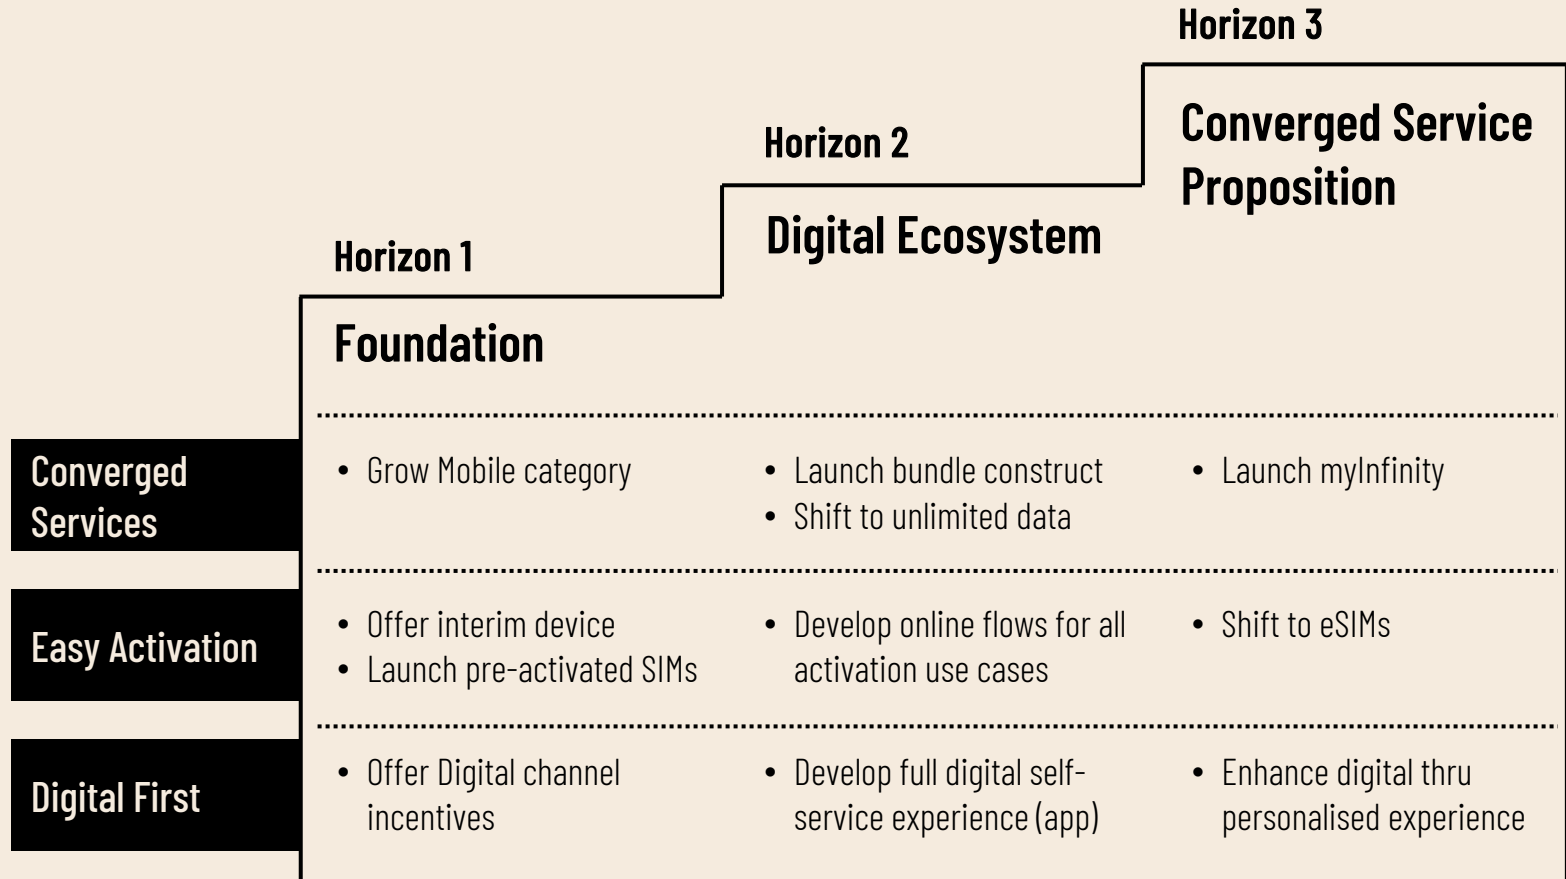

Capability Maturity

Milestones

High Level Roadmap

Answer Strategic Questions (1/2)

1

Why Change

- **Burning Platform:**
New entrants and rising network costs

2

What Is Winning

- Be the **#1 challenger brand** in the price savvy segment

3

Where To Play

- **Geo:** Nationwide
- **Market:** Internet Connectivity
- **Category:** Home Broadband and Mobile services
- **Segment:** Price sensitive

4

How To Win

- **Re-position** as integrated services provider

Answer Strategic Questions (2/2)

5

What is Our Big Idea

- Build a **converged services proposition** with unlimited, shared data that lets customers dial up and down their service experience

6

What Choices Do We Make

- **Re-position** as integrated services provider:
 - Build **converged services proposition**
 - Create **easy activation** for the main use cases
 - Design experience to be **digital first**

7

What Capabilities Do We Need

- Invest in **product and network capabilities** to create converged proposition
- Invest in the **digital experience** of sales and service channels

8

How Will We Execute

- Horizon 1. Build the **foundation** and fix the basics
- Horizon 2. Create a **digital ecosystem** and modernise the channel experience
- Horizon 3. Deliver the **converged services proposition**

THANK YOU!
